The art of longevity

Artilat holds a leading European position as a manufacturer of a well-balanced range of latex foam products. Thanks to our close collaboration with the bedding industry, we are able to supply our partners with top quality products.

Artilat es el principal fabricante europeo de una línea de productos de látex bien equilibrada. Gracias a la estrecha cooperación y relación con la industria del sector del descanso y la alta tecnología incorporada a nuestra empresa, estamos produciendo una calidad superior en látex para colchones.

DUNLOP/VULCANISATION TECHNOLOGY

ClimaLatex® Characteristics

Ventajas de ClimaLatex®

ClimaLatex® Patent Nr 1 444 925

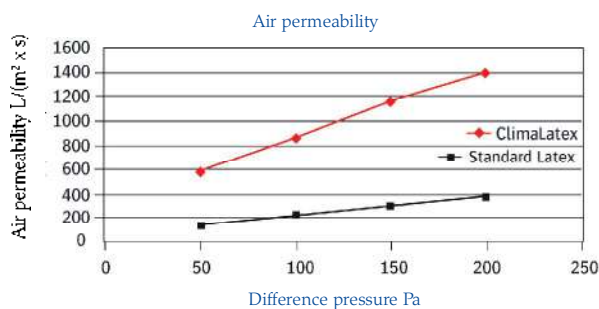

Luxurious comfort, ClimaLatex® Technology is combining the advantages of the Dunlop process (durability) with the Talalay process (air ventilation), resulting in:

- Optimal orthopaedic body support
- Reduces high pressure points that shut off blood flow
- Anti-bacterial, dust-mite resistant
- High resistance and uniformity
- Superior self-ventilation and moisture regulating due to open cell structure and thousands of perforations, see graph below

La tecnología ClimaLatex® le da un confort de lujo: combina las ventajas del método de producción Dunlop (durabilidad) y las del procedimiento de Talalay (ventilación), dando resultado a:

- *Adaptación sumamente favorable al cuerpo*
- *Reduce la presión corporal de más peso y favorece consecuentemente la circulación sanguínea*
- *Antibacterial, resistente al moho*
- *Alta resistencia, uniformidad*
- *Ventilación superior y regulación de humedad gracias a la estructura de células abiertas y miles de perforaciones, ver gráfico debajo*
